

Fowler Hall gets new look

by Barbara Fink

The School of Education and Human Services (SEHS) recently vacated Fowler Hall so that renovations to the building could begin. Most faculty and staff members have relocated to College Hall.

"The main purpose of the renovations is to make the building usable by people with physical disabilities," said Chuck Mann, assistant director of Business Services. "Right now, only the first floor is accessible. The renovations include installing an elevator and adjusting the doorways and bathrooms so that they are accessible.

"Other changes include replacement of obsolete and inefficient heating, air conditioning, ventilation, and lighting systems.

David Martin, incoming dean of SEHS, said that the changes in Fowler Hall will help to improve program planning, student advising, classroom dynamics, and the overall ability of SEHS to serve students.

"The SEHS staff analyzed the needs of its various departments and came up with a plan to utilize the building," said Boris Bogatz, interim dean of SEHS. "The architects will use the plan to reconfigure rooms and design offices, classrooms, and conference rooms."

Construction began on May 20 and is expected to be completed by December 31, 1985. "To minimize disruption, we scheduled this to coincide with the end of the spring semester," said Mann. "Everyone should be back in Fowler Hall in time for the 1986 spring semester."

The college is currently conducting a

The First Lady of Tunisia, Mrs. Bourguiba, was welcomed to Gallaudet June 17th by Dr. Louis Markwith, Dr. Mervin Garretson, Dr. Robert Davila, Dr. Michael Deninger, and Mr. Eli Savanick. Following a reception, Dr. Deninger gave Mrs. Bourguiba a tour of Kendall Demonstration Elementary School where she met and chatted with students.

Dr. Raymond Trybus (center) introduced visiting Italian neuropsychiatrists Dr. Riccardo Callori di Vignale (left) and Professor Marinella Rosano (right) to faculty and staff at Fay House on June 7.

Visiting Italian neuropsychiatrists discuss rehabilitation research

by Robert Johnson

"What you here at Gallaudet call 'total communication' is a good example of what we consider a 'healthy adaptation,'" said Dr. Riccardo Callori di Vignale, translating from the Italian of Prof. Marinella Rosano. "If one sensory channel is blocked, we explore what can be done to unblock it, but we don't—as many doctors and therapists do—devote all our attention to the deficit. When helping a deaf child, we try to discover how the child can use his or her body and other senses to create a healthy way of life."

Callori, head of a neuropsychiatric clinic for children in Rome, and Rosano, head of the Department of Child Psychomotor Rehabilitation at the University of "La Sapienza"—also in Rome—are well known and widely published leaders in the field of child neuropsychiatry. Although deafness is only one of a wide range of disabilities they encounter in their work, they are seeking a fuller understanding of the

special problems and adaptations of deaf people.

From May 25 through June 11, they were guests of the Gallaudet Research Institute. Near the end of their visit, they spoke enthusiastically about what they had learned.

Raymond Trybus, Dean of Graduate Studies and Research, expressed equal enthusiasm for the fresh perspectives on rehabilitation Rosano and Callori shared with researchers, faculty, and staff during their stay. After their June 7 presentation, "Early Rehabilitation: A New Approach to Children Showing Neuropsychomotor Disorders," given to an audience of researchers and faculty, Trybus commented that "our concern with communication problems at Gallaudet sometimes gets in the way of our appreciation of what Drs. Rosano and Callori have been telling us. Deaf people are capable of as wide a range of adaptations to life as anyone. Thinking of them primarily as people who cannot hear makes us lose sight of the

Policeman helps volleyball team

On Sunday June 16th the U.S. athletes competing in the World Games for Deaf (July 10-20th in Los Angeles), arrived at their training camp in Colorado Springs. Although Brad Lampshire wasn't with them, he can still still feel like part of the team. Lampshire, a Capitol Hill police officer who moonlights as a United States Volleyball Association referee and also officiates for the embassy volleyball league in Washington, has a special interest in the Games. He helped raise more than \$2,000 to help send several U.S. women volleyball players to Los Angeles this summer.

Lampshire became interested in the World Games after officiating a tourna-

ment in which Gallaudet sophomore, Sally Ripley was playing. Impressed with Ripley's playing ability—he calls her a "wicked" volleyball player—Lampshire chatted with Gallaudet coach Peg Worthington and learned that Ripley had been selected for the U.S. women's volleyball team for the World Games. When he discovered that each athlete had to raise approximately \$2,000, Lampshire offered to help.

Lampshire says that he raised the funds largely by talking to people "eyeball to eyeball." He credits the various recreational volleyball teams in Northern Virginia with contributing to

New book result of 10-year study

The American Speech-Language-Hearing Association (ASHA), culminating a 10-year joint endeavor with Gallaudet College and the federal government, has developed a text on hearing-impaired, developmentally disabled children and youth published this month by the College Press.

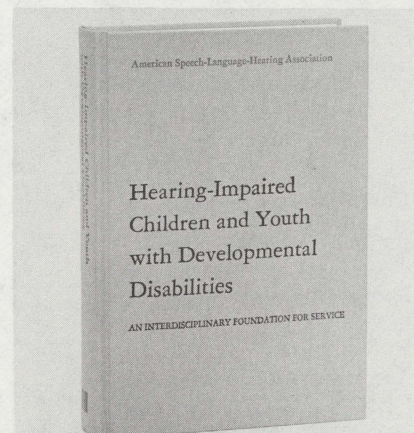

Data in the book document the importance of the topic. More than 30 percent of the hearing-impaired children and youth in the United States have one or more additional disabilities that impact their academic and social functioning.

The tremendous variation of types and degrees of additional disabilities, on top of differing degrees of hearing loss, has both challenged and frustrated special educators and service providers. While great strides have been made in the past decade concerning programs and services specific to deafness or mental retardation, for example, children and youth with multiple disabilities have lacked neat labels, clearcut advocates, coordinated services, and innovative programming.

"Hearing-Impaired Children and Youth with Developmental Disabilities: An Interdisciplinary Foundation for Service" attempts to fill these gaps. The 416-page book is edited by Evelyn Cherow (ASHA) with guest editors Noel D. Matkin (University of Arizona) and Raymond J. Trybus (Gallaudet Research Institute).

The College cooperated with ASHA at various stages of the project, including fact-finding, workshops, proposals, and book production. In addition to Trybus, five other Gallaudet professors are among the 24 contributors to the 416-page book: David Updegraff (Pre-College), Lynne Blennerhassett (psychology), Judith Johnson (education), Michael Karchmer (demographics), and David Tweedie (communication).

The hardcover book is available now for \$29.95 at the College Bookstore.

help send Sally and other players to the Games.

"Some teams gave up their forfeit fees," Lampshire said, explaining that forfeit fees are paid if a team doesn't show up for a scheduled match. He also reports that many teams would listen to his appeal and hand over their evening's pizza and beer money. "Now they all want to know what number Sally will be wearing during the Games," he says.

Although Lampshire won't be attending the Games in Los Angeles, he does hope to attend the World Games for the Deaf in 1989.

Brad Lampshire presents check to Olivia Schnoor of U.S. Women's Volleyball Team.

physical and intellectual individuals we are working with."

For many years (30 in Rosano's case) Rosano and Callori have been developing a flexible, holistic approach to the diagnosis and rehabilitation of children who have muscular, motor, or emotional difficulties as a result of neurological or sensory damage. They have found that, although the pathology of such major problems as cerebral palsy or such minor problems as clumsiness does not tend to change, the development of the "total child" does, so rehabilitators must revise their view of what needs to be done at every stage.

Because their rehabilitation approach emphasizes the importance of in-

dividuals' perceptions and use of their bodies, Rosano and Callori's work—even with deaf children—centers on exercises intended to improve muscle tone and coordination. Following their June 7 presentation, GRI researcher Tony Wolff, who is using neurometric procedures to study deaf children, expressed interest in comparing his preliminary findings with Rosano's. Some evidence indicates that certain deaf children may have difficulty with movement and coordination.

Upon their return to Italy, Rosano and Callori plan to continue to expand their rehabilitation efforts in the area of deafness. According to Vera Follain-Grisell, of the GRI, as a result of their visit they plan to facilitate the identification of assessment services to deaf children in Italy.

Fowler Hall

fundraising campaign to cover the costs of construction. It has received a challenge grant from the Pugh Memorial Trust and has already received a contribution from the William Randolph Hearst Foundation, according to Marianne Jordan of the Development Office. The college has until December 31, 1985 to match the grant with donations from private, nonfederal sources. The Pugh Memorial Trust earlier gave money toward renovations at the Northwest campus.

Until Fowler Hall is complete, most SEHS staff can be found on the fourth floor of College Hall. "When we were told we had to vacate the building, we were given several options," said Bogatz. "The overwhelming consensus of the group was to stay together."

Fowler Hall was completed in 1918 and was used until 1977 as a dormitory for women. It then housed the Kendall School while its new facility was being completed. In 1979, the newly formed School of Education and Human Services moved in.

NEXT WEEK *On the Green* welcomes a new editor: Jim Stentzel, formerly with the College Press.

Announcements

Computer Services is offering three introductory courses during July related to the IBM personal computer: "Intro to the IBM PC AT," "Intro to IBM Assistant Series," and "Intro to dBASE III." These short courses are free to faculty and staff who have their supervisor's permission. Complete details and registration forms will be sent to all personnel shortly. For more information, call x5613 (voice), x5616 (TDD), or stop by User Services in HMB-118.

SLIGE classes (sign language instruction for Gallaudet employees) will be offered during the summer if enough staff members of the same signing level are interested. Contact Lynn Jacobowitz x5633 for more information.

Please note: Extension and Summer Programs can be reached on x5600.

The Deaf Enrichment Festival lecture series continues on Tuesdays and Thursdays from 4:30 to 5:30 p.m. in the Ely Center Auditorium. Barbara Kannapell discusses "Cross-Cultural Communication" on June 27, and Dr. Frank Turk presents on "Motivating Today's Learners" on July 2.

Classified Ads

FOR RENT: Condominium in Ocean City. Sleeps 6. Largest pool in Ocean City. One block from beach, near shopping centers. For information call Ron at x5941 or Agnes at 434-6409 (TDD).

FOR SALE: Imported tablecloth and set of 12 napkins from Portugal. Size 2.50 by 1.50. Suitable for large dining-room table. Call x5703 for more information.

FOR SALE: 1981 Sailboat—Venture 22 foot. Fully equipped—trailer, 3 1/2 HP Mercury engine, 2 sails. Excellent condition. Must sell by July 15. Best offer. Call 560-3140 (voice only) days and evenings.

FOR SALE: Two Gold World Games for the Deaf 500 Club combo tickets. \$95 each. Must sell. Contact Lynn at x5633 daytime only.

FOR SALE: Model 15 TTY (antique) with working coupler. Must sell. \$150. Contact Lynn at x5633 daytime only.

FOR RENT: New condo/Ocean City. Bayside on canal. 120th St. 2 BR, 2 baths. Sleeps 6. A/C, w/d, pool, private boat dock, tennis, racquetball. For more information call Jane or Mike Golightly after 2 p.m. at 301-596-5555 or evenings after 10 p.m. at 463-9451.

FOR SALE: Queen size, extra firm mattress and boxspring set. Excellent condition. Must sell before July 15th. \$130. Call 270-8430 (voice/TDD) eves.

APARTMENT AND HOUSE-SITTER: Mature, experienced apartment/house-sitter needs place in Aug. and/or Sept. Prefer American University/Sibley area. Excellent references. Call Nancy at 966-2093 (voice) days only.

STORAGE AREA: Looking for large, clean storage area. Large basement or garage OK. Call Nancy at 966-2093 (voice) days only.

APARTMENT NEEDED: Church professional seeks inexpensive apt. with large storage area. Looking for 2 bdrm or 1 bdrm and den. Furnished rm w/walk-in closet on first floor also OK. Call Nancy at 966-2093 (voice) days only.

LOST: Set of keys lost on campus. Contact *On the Green* editor if found.

FOR SALE: Men's 10-speed Schwinn 27" bicycle. Quick release tire. Like new. \$200. or best offer. Call 261-6294 (TDD) eves.

FOR RENT: Mobile home in Fenwick Island, DE. Sleeps 6, dishwasher, a/c, w/d. \$50 per night, weekends. \$45 per night weekdays. Call Beth or Dwight at 498-4521 (TDD).

FOR RENT: Fully renovated townhouse. 3 br plus den. 1 1/2 baths. Large yard. 2 blocks from Gallaudet. Available now. \$650/mo. plus utilities. Call 544-7440 or 544-8689.

FOR SALE: Fully renovated townhouse. 3 br, 1 1/2 baths, large kitchen. 2 blocks from Gallaudet. \$75,000. Call 544-6300 or 397-3146.

FOR SALE: Bentley Super 8 movie camera and BX-11 home movie projector w/4 inch screen. Never used. \$150. or best offer. Call 490-6403 (voice/TDD) eves.

SALE or RENT: Seashore condo in Ocean City. 122st. Mirabella 3A condo. Ocean-block/bay view. One bdrm, efficiency, furn., sleeps 4 plus. Excellent investment. Sale \$39,000. Weekly and/or weekend rentals available. Call Maria Waters at 596-0787 (voice/TDD).

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Programs at x5034 (voice or TDD).

Deadline	Program
6/24/85	ED: Training of Interpreters for Deaf Individuals
7/15/85	DRF: Deafness Research Foundation
7/22/85	NIHR Research Fellowships
8/1/85	NSF: Special Activities in Pre-College Science and Mathematics Education

8/6/85	NEH: Program Development in the Humanities
9/15/85	Dyslexia Research
11/1/85	CIES: Fulbright Scholar Awards
11/1/85	NIMH: Research on Methods for Studying Mental Health Services Systems.

NIMH funding

The National Institute of Mental Health (NIMH) has announced availability of funding for research on methods for studying mental health services systems. Applications will be accepted on November 1, 1985; March 1, 1986; and July 1, 1986. Support may be requested for up to two years and will encourage research to improve methods to conceptualize, identify, measure, characterize, analyze, and describe features of mental health service systems at local community, state, or national levels. For further information call NIMH at 443-4233 or the Office of Sponsored Programs at x5034.
